

Black Friday and Christmas 2022

The holiday season and the busiest time of the year for parcel deliveries is approaching. During the year, Bring has invested heavily in our network and infrastructure, in order to be well equipped for the final months of the year.

Delivery times

Despite extensive planning and manning up, delays and slightly longer delivery times may occur with heavy volume increase during this time. Weather and road conditions can also be unpredictable, and we therefore recommend our customers to allow for a slightly longer delivery estimate.

Ahead of Christmas

In order to reach all recipients throughout the country before Christmas, it is important that all goods have reached our sorting terminals on time. The deadline for submission varies for different destinations and is detailed in the table Deadlines Christmas 2022.

Our preparations this year

- Expanded capacity at existing sorting terminals
- Increased number of delivery points throughout the country and increased capacity
- Full production at our terminals, with operations working around the clock and on weekends during the most intensive parts of the period
- Several new distribution terminals
- Increased staffing at sorting terminals and distribution terminals
- Large increase in number of vehicles at the distribution terminals
- Increased staffing and extended opening hours in customer service to handle your customers' inquiries

Deadlines Black Friday 2022

Please note that the dates below apply for submission at the respective sorting terminals. It is therefore important, to take into consideration additional time for parcel pickup.

| Country | Sorting terminal | To zip code | Last submission |
